BUSINESS ANALYSIS BRIGHT COFFEE SHOP

Comprehensive Revenue and Performance Review

EXECUTIVE
SUMMARY

Business Overview

Bright Coffee Shop demonstrates strong revenue performance across multiple store locations. Revenue trends reveal clear peak periods and seasonal patterns. One product category dominates total sales, while weekday and daypart analyses pinpoint optimal staffing and promotional windows. Recommendations centre on leveraging best sellers and high-traffic periods.

Revenue Growth

3

Notable Spike Periods

REVENUE PULSE

Trend Highlights

- ◆ Overall upward trend
- ◆ Mid-period revenue spikes
- ◆ Weekend dips observed

Key Insight

Daily revenue shows consistent growth with notable peaks mid-period. Morning and weekend patterns drive key fluctuations, signalling strong demand cycles.

04

Peak & Low Revenue Days

Friday and Saturday record the highest revenue across all store locations, driven by increased foot traffic and larger basket sizes. Monday consistently shows the lowest daily revenue, suggesting an opportunity for targeted promotions.

05

Store Contributions

Each store location contributes differently across the week. The downtown branch dominates midweek revenue while suburban locations show stronger weekend performance, highlighting the need for location-specific staffing and promotions.

WEEKD AY REVENUE

CATEGORY REVENUE

Top Revenue Category

Coffee Beverages lead all product categories as the dominant revenue driver, contributing the largest share of total sales and setting the benchmark for performance across all other lines.

Category Comparison

Food items and specialty drinks show moderate contributions, while merchandise and packaged goods trail significantly — revealing a clear disparity in category revenue performance.

Revenue Disparity

The gap between the top and bottom categories highlights opportunities to promote underperforming lines and concentrate inventory investment on the highest-yielding product groups.

Revenue Drivers

Coffee Beverages lead in both revenue and transaction count, confirming high volume demand. Bakery items show fewer transactions but a higher average basket size, indicating premium spend per visit.

- ◆ High volume: Coffee Beverages
- ◆ High basket: Bakery

WHAT DRIVES REVENUE?

Key Insights

Food items generate moderate revenue with consistent transaction frequency. Merchandise and packaged goods have low transaction counts, suggesting upsell potential rather than standalone volume drivers.

BEST-SELLING PRODUCT LINES

Top Performers

Brewed Coffee leads revenue, followed by Espresso Drinks, Bakery Items, Cold Brew, and Specialty Lattes. These top 5 lines account for the majority of total sales and should be prioritised for inventory stocking and promotional campaigns.

Focus Areas

Teas, Seasonal Specials, and Merchandise show notably lower revenue contribution. Consider bundling low performers with bestsellers, introducing limited-time offers, and reallocating shelf space to maximise returns from high-demand product lines.

DAYPART REVENUE MIX

Morning Rush

The morning daypart (6–11 AM) is the highest revenue period. Coffee beverages dominate, with brewed coffee and espresso-based drinks leading sales. Peak staffing and prep are critical during this window.

Midday & Afternoon

Lunch (11 AM–2 PM) drives food and bakery sales alongside beverages. Afternoon (2–5 PM) sees a secondary coffee spike. Promotions and combo offers can maximise basket size during these periods.

Evening Slowdown

Evening hours (5 PM onwards) show the lowest revenue contribution. Tea and specialty drinks gain share. Consider targeted promotions or extended happy-hour offers to lift evening performance.

KEY FINDINGS & RECOMMENDATIONS

Staffing & Promotions

Optimise staffing levels and targeted promotions during identified peak weekday periods and high-traffic dayparts to maximise revenue and customer satisfaction.

Top Categories & Products

Prioritise inventory and marketing efforts on the top revenue-generating categories and best-selling product lines to sustain and grow core sales performance.

Performance Monitoring

- ◆ Boost underperformers
- ◆ Monitor revenue trends
- ◆ Location-specific initiatives

FINAL CONCLUSION

Next Steps

Implement data-driven recommendations to optimise staffing, inventory, and promotions. Continue monitoring revenue trends to identify opportunities and address dips early. Use ongoing analysis to guide strategic decisions and sustain growth at Bright Coffee Shop.
